PERSONAL PROJECTS

EV Smart (02/2021 - 03/2021)

- Currently we are seeing that there high surge in purchasing of electric cars and bikes. Government is still developing good infrastructure for making availability of enough charging stations. EV Smart is small initiative that will help people to add their own charging station as well as they can look up for other charging station on the way.
- Let's say someone need to charge their vehicle in middle of journey but no any government charging point available. That time you can take help of EVSmart, just one click away from finding good charging station. This app is live on web, you can take look at it.

Blog Posts (02/2022 - 02/2022)

- It is a web app for posting blogs and users will be able to see the other's posts as well.
- This web app is built using React js, Node js, Express js, MongoDB. Also JWT based authentication is implemented.
