WORK EXPERIENCE

Software Developer
Intellection Software & Technologies Pvt. Ltd

05/2021 - Present   *Pune*
Achievements/Tasks

- Led the project to complete requirements of client before deadlines.
- Developed reusable components and libraries for future use and for lesser dependency on external libraries.
- Managed, optimized code of frontend for better performance.
- The technology used like ReactJS, JavaScript, HTML, CSS,etc., followed test driven environment for development.

PERSONAL PROJECTS

EV Smart (02/2021 - 03/2021)
- Currently we are seeing that there high surge in purchasing of electric cars and bikes. Government is still developing good infrastructure for making availability of enough charging stations. EV Smart is small initiative that will help people to add their own charging station as well as they can look up for other charging station on the way.
- Let's say someone need to charge their vehicle in middle of journey but no any government charging point available. That time you can take help of EVSmart, just one click away from finding good charging station. This app is live on web, you can take look at it.

Slinger (01/2021 - 01/2021)
- Slinger is web based chatting application. App is hosted on heroku, frontend is built using Reactjs while backend is built using chatengine.io. Chatengine provides good api to make a chatting application on web or on mobile.
- Anyone who wants to chat with your friends, create your account ask your friend to make account as well and just dive into it.

Blog Posts (02/2022 - 02/2022)
- It is a web app for posting blogs and users will be able to see the other's posts as well.
- This web app is built using React js, Node js, Express js, MongoDB. Also JWT based authentication is implemented.
